

# Meet Your New Job Manager

## VIAVI StrataSync for Cell Site Contractors

Streamline test results collection with StrataSync cloud-based test data management.

Spend time doing the job rather than proving you've done the job. Typical installation tests include fiber inspection, coax cable, OTDR, and antenna alignment.

### The Old Way

**Lengthy, error-prone, manual process • Delays close-out**

### A Better Way

**Eliminating emails, USB sticks, and PC post processing reduces costly errors  
Never revisit a site due to a lost test report again • Review results and create the closeout package while the team is still on site**

VIAVI OneAdvisor 800, 3Z RF Vision, Job Manager and StrataSync make it easy for easy for cell site contractors to get in, get out and get paid.
